
VMware View: Install Configure Manage

Duration: 4 **Course Code: VMVIEW4**

Overview:

This hands-on training course builds your skills in the VMware View suite of products: VMware View Manager, VMware View Composer, and VMware ThinApp™.

Target Audience:

System administrators and system integrators experienced with VMware Infrastructure 3 who are responsible for their organization's deployment of VMware technology for virtual desktop infrastructure.

Objectives:

- After this course, the student should be able to:
 - Install and configure the VMware View components
 - Create persistent and nonpersistent desktop pools
 - Configure virtual desktops for printing, USB redirection, and multimedia redirection
 - Configure authentication using devices such as smart cards or cryptographic authentication fobs
 - Use VMware View Composer to deploy and manage linked clone virtual desktops
 - Package applications using VMware ThinApp for a VMware virtual desktop infrastructure
-

Prerequisites:

Required

- Experience in Microsoft Windows Active Directory (AD) administration
- VMware Infrastructure: Install & Configure (VM13IC)

Basic Skills Self-Assessment

You must already have these skills:

- Create a template in VMware vCenter Server and deploy a virtual machine from it.
- Modify a template customization file.
- Open a virtual machine console on vCenter Server and access the guest operating system.
- Modify a virtual machine's hardware (add disk, add NIC). Configure Windows AD roaming profiles

Testing and Certification

There's no certification linked to this training.

Content:

Module 1: Course Introduction

Module 2: Introduction to VMware View

- VMware View features and components

Module 3: VMware View Connection Server

- Installation and configuration
- View Administrator

Module 4: VMware View Virtual Desktops

- VMware View Agent
- USB redirection and multimedia redirection

Module 5: VMware View Client Options

- VMware View Client
- VMware View Portal
- Thin clients and Offline Desktop

Module 6: View Administrator

- Persistent and nonpersistent pools

Module 7: Configuring and Managing Linked Clones

- VMware View Composer configuration
- Deploying and modifying linked clone desktops

Module 8: Unified Access

- Accessing physical systems, blade PCs, Terminal Services

Module 9: Virtual Printing

- Seamless printing from desktop to client printers

Module 10: Managing View Security

Module 11: View Manager Performance and Scalability

- Performance enhancements and load balancing

Module 12: VMware ThinApp

- Deploying applications using VMware ThinApp
