

VMware Training

There are a number of VMware training courses we can offer benefiting from authorised VMware Instructors, courses leading to certification and even tailored courses to suit your own environment.. The following courses are available:

VMware Fast Track 3.5

This intensive, extended-hours training course covers the installation, management, and use of ESX Server, VirtualCenter, VMware DRS, VMware HA, and VMware Consolidated Backup.

This class is designed for experienced system administrators and system integrators who are responsible for scaling their organisation's deployment of VMware technology.

Duration: 5 days

Certification: VCP

Price: £2,950.00

VMware Deploy, Secure and Analyse

This training course focuses on performing scripted installations of ESX servers, Service Console security, monitoring of ESX servers, VMware HA, Distributed Resource Scheduling, VMware Consolidated Backup and fault analysis. It is a continuation of a preceding course entitled "VMware Infrastructure 3: Install and Configure."

This class is designed for systems administrators and systems integrators experienced with Virtual Infrastructure 3 who are responsible for scaling their organization's deployment of VMware technology.

Completion of this course meets the class requirements for VMware Certified Professional.

Duration: 4 days

Certification: N/A

Price: £2,010.00

VMware Deploy, Secure and Analyse

This hands-on training course explores VMware Infrastructure 3, which consists of VMware ESX Server and VMware VirtualCenter. This course is continued in a follow-on course entitled VMware Infrastructure 3: Deploy, Secure, and Analyze.

This class is designed for system administrators, systems engineers, and operators responsible for ESX Server and/or VirtualCenter

Completion of this course entitles the participant to attempt the examination for VMware Certified Professional status.

Duration: 4 days

Certification: N/A

Price: £2,010.00
