Patch Management (PM) Service

Satisnet have partnered with Ivanti to bring you an extensive Patch Management Managed Service at an affordable price.

Why manage PM internally when you can utilise Satisnet's 20+ years expertise to do it for a cost that is only marginally more than licencing cost. Let Satisnet optimise and automate this normally mundane task, and help you risk manage your cyber exposure.

Park here for your full PM Service

- Risk-based patch management methodology developed by hands-on experts
- Monthly and critical patching service – e.g. scheduled, critical, urgent
- Recommended patching policies based on risk to your organisation – to really prioritise your asset 'fix list'
  - o Is this vulnerability being exploited in the wild?
  - o Is it being used in active malware?
  - o How safe and stable is the patch?
- Real-time dashboarding and reporting

Options

The PM Service is delivered as a cloud service utilising Ivanti Neurons.

We scan monthly, or more often as required – especially if a new attack is being seen – and produce a list of targetted recommendations of areas that need to be patched immediately.

| URGENT | CRITICAL | SCHEDULED |
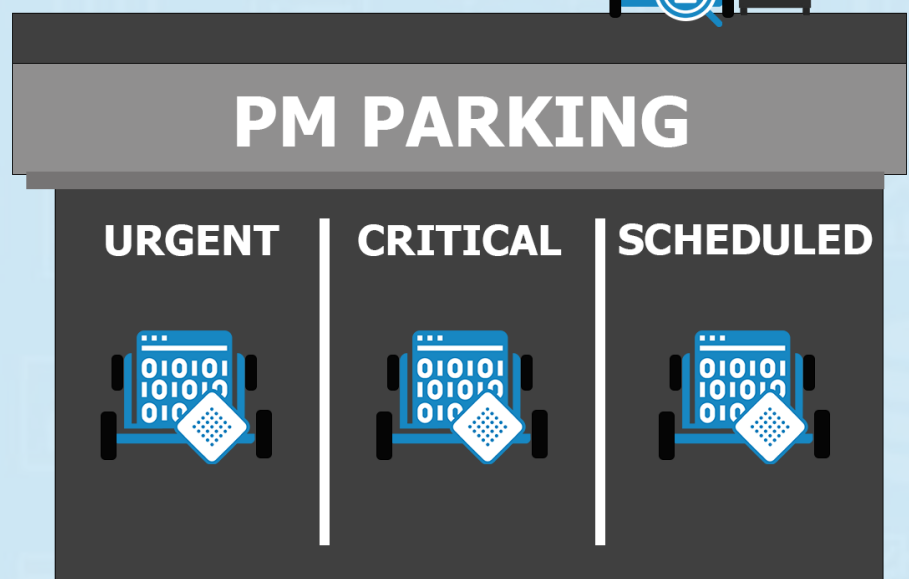

PM Service Key Features

Feature	Description
Deploy Discovery Scanner	Entire network scan to confirm all assets are being scanned and confirm asset count
Deploy Ivanti Neurons Patching Agent	Deploy on each machine using Active Directory, MEM, Intune, etc. and ensure secure network communication to the cloud service
Scan Policies	Provide best practices around scan policies
Patch Status Scan of all Assets	Understand current risk posture and create succinct recommendations to the customer based on how risk levels associate to specific assets
Scan Schedules	Create flows and timings around scan schedules
Prioritise Assets and Hosts	What needs patching as a priority, recommendations, and then agree 'to do' list with
Patch Deployment	Deploy agreed patches – including testing and rollback options
Dashboards	Publish dashboards to service owners with key information
Reports	Create scheduled reports for service owners

Pricing

You will not be surprised with any hidden extras. See a full price breakdown below.
