

# Risk-Based Vulnerability Management (RBVM) Managed Service

Why manage RBVM internally when you can utilise Satisnet's 20+ years expertise to take your vulnerability program to the next level. Make use of advanced automation to optimise and prioritise risk, and achieve effective cyber risk exposure management.

## Service Features

Advanced RBVM methodology developed by hands-on experts

We prioritise the results, so you only fix what you need to

Dashboards and scheduled reports are generated for service owners with key information

Full lifecycle management – scanner deployment, tuning, updates, management, and 24x7x365 support

Leave it to us to configure and then scan your network assets, using a variety of scanning policies (e.g. ISO27001, CIS, NIST, PCI)

Assets	Cost
100	£300
200	£450
300	£550
400	£700
500	£800

Single Scanner Appliance  
Cost Per Month – 12 Month Minimum  
One-Off Onboarding Cost (£1,000)

Vulnerability management is time-consuming and resource-intensive. Let Satisnet do it for you for a fraction of the cost!

Satisnet do not offer a 'cookie cutter' approach to MSSP Services. Instead, we partner with, and tailor our services to, your organisation in order to optimise tooling, people, processes, and costs to fit your exact requirements.
