Leveraging real-world phishing intel
All Attack Simulator training content uses real- time Microsoft phishing data.

Accessible, diverse content
Provide dynamic phishing training to all users in a variety of formats.

Hybrid security awareness options
Leverage additional Terranova Security training for proactive security awareness training.

The Microsoft stack advantage
Take advantage of phishing training built specifically for Microsoft users

Protect Your Data with Microsoft-Approved Awareness Training

Terranova Security's industry-leading security awareness training solution is helping E3 customers worldwide strengthen their data protection. With Microsoft's endorsement and preferred pricing, organisations not willing to make the jump to E5 can still enjoy high-quality training content, a variety of customisation options, and multilingual support.

Additional Terranova Security awareness solution benefits include:

- Targeted, risk-based training framework that improves click rates
- Accessible, inclusive learning modules available to all users
- Mobile responsive content that facilitates on-the-go training
- A variety of course and phishing simulation customization options
- Dedicated customer support and Managed Services in English and French

Easy-to-use interface

Quickly modify your training environment with simple, intuitive controls

Customizable branding options

Add logos and edit colours to personalise your learning experience

Straightforward implementation

Seamlessly create, launch, and monitor security awareness and phishing campaigns

Multilingual support

Craft a dynamic training program or phishing simulation in your preferred language(s)

Terranova Security Partners with Satisnet and Microsoft Bringing the Best in Security Awareness Content to Users
